Te presentamos nuestro nuevo servicio de diseño y elaboración a medida de piezas especiales: Custom Design Hub. Un departamento centrado en dar solución a las necesidades únicas y personalizadas que demanden tus proyectos.

We see *ceramics* as an extension of who we are

Our creativity flows from embracing the natural, the beauty of imperfection, respect for the earth and the purity of a material that tells its own story. Each piece is born from the inspiration that comes when design meets the human soul, free from barriers and pretension.

Entendemos la cerámica como una extensión de nuestra esencia. Nuestra creatividad fluye al abrazar lo natural, la belleza de lo imperfecto, el respeto por la tierra, la pureza de un material que cuenta su propia historia. Cada pieza nace de la inspiración que brota cuando el diseño más puro se encuentra con el alma humana, sin barreras ni pretensiones.

We innovate not only in design, but also in the way we understand the world: through human value, where together we create something greater than we could achieve alone. We are a team united by passion, as if in a collective dance. For us, every project is an opportunity to experience the beauty, togetherness and connection we are driven by.

There are no limits to the creative spirit that surrenders to the art of transforming spaces because we believe in the strength of our people and what moves us is the beauty of what we are together.

Innovamos no solo en diseño, sino en la forma de entender el mundo: desde el valor humano, donde juntos creamos algo más grande de lo que podríamos lograr solos. Somos un equipo unido por la pasión, como sumergidos en una danza colectiva. Para nosotros, cada proyecto es una oportunidad para hacer tangible la belleza, el sentido de pertenencia y la conexión que nos mueve.

No existen límites cuando el alma creativa se entrega al arte de transformar espacios, porque creemos firmemente en la fuerza de nuestra gente y lo que nos impulsa es la belleza de lo que somos juntos.

Walking Together

Milestones
of Our Essence

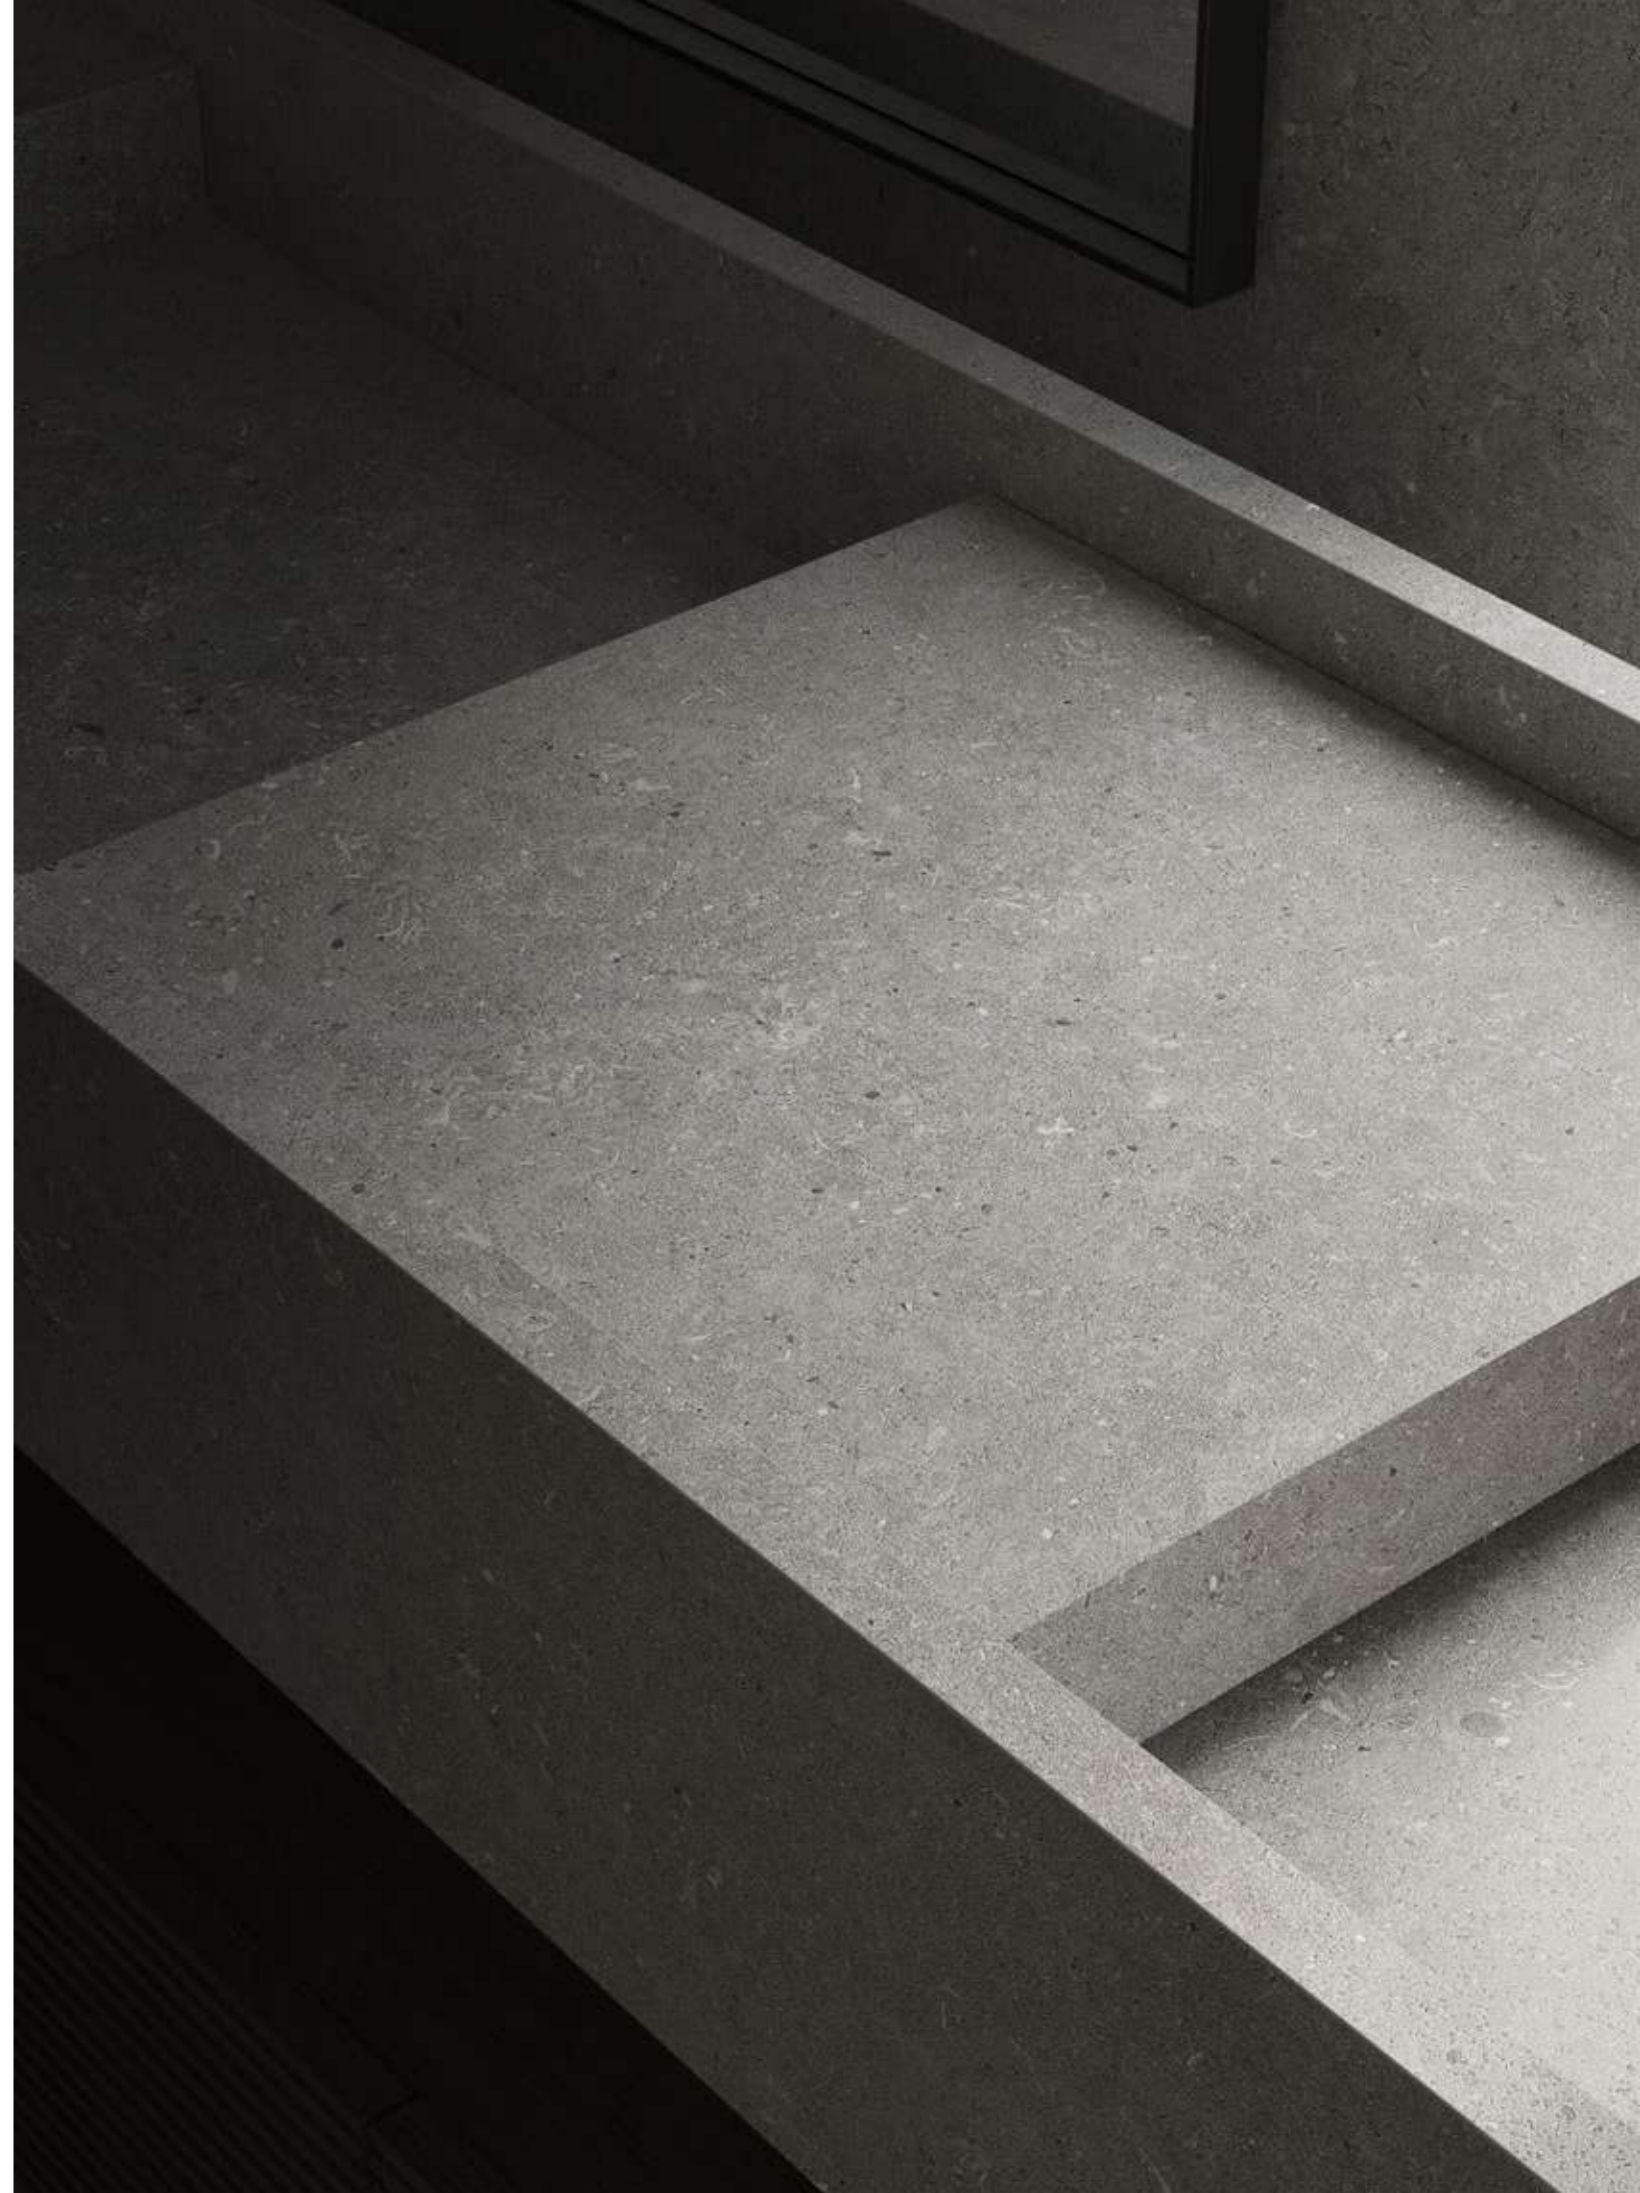

The Beginning of Change

Creative freedom and precision on plan. Craftsmanship and technology. Custom Design Hub is created to bring together totally different design perspectives, but together they achieve a perfect encounter. Custom Design Hub is born as a meeting point between your most demanding custom projects and our expertise in the design and manufacturing of custom pieces. We focus on establishing a continuous dialogue with the professional from the initial approach, through the design, the handcrafted manufacturing in our workshop and the final advice. In this way we give the value it deserves to the handmade product as a synonym of exclusivity and authenticity. The result will be unique pieces in the market, with impeccable finishes, and totally adapted to the functional, spatial and aesthetic needs of each project. To achieve this, we combine two key elements: on the one hand, the high quality and differentiation of our ceramic surfaces. On the other hand, the experience of a team that combines exquisite craftsmanship and the control and intelligent use of the latest technology to ensure pieces that exude elegance and quality while being functional for the project for which they are intended. Because unique projects require unique solutions, Custom Design Hub is the perfect partner to make them a reality.

Libertad creativa y exactitud sobre plano. Artesanía y tecnología. Custom Design Hub nace para unir perspectivas del diseño totalmente diferentes pero que unidas logran un encuentro perfecto. Nuestro taller nace como punto de encuentro entre tus proyectos a medida más exigentes y nuestra experiencia en el diseño y fabricación de piezas bespoke. Nos focalizamos en entablar un diálogo continuo con el profesional desde el planteamiento inicial, pasando por el diseño, la fabricación artesanal en nuestro taller y el asesoramiento final. De esta forma damos el valor que merece al producto handmade como sinónimo de exclusividad y autenticidad. El resultado serán piezas únicas en el mercado, con acabados impecables, y totalmente adaptados a las necesidades funcionales, espaciales y estéticas de cada proyecto. Para conseguirlo, unimos dos partes claves: por un lado, la alta calidad y diferenciación de nuestras superficies cerámicas. Por otro lado, el expertise de un equipo que aúna el manejo exquisito de la fabricación artesanal y el control y uso inteligente de la última tecnología para asegurar piezas que rebosan elegancia y calidad a la vez que resultan funcionales para el proyecto para el cual están pensadas. Porque proyectos únicos requieren soluciones únicas, Custom Design Hub es el aliado perfecto para hacerlos realidad.

The Workshop

Our workshop is the place where the most demanding and specific design needs come together with our experience and manufacturing capacity in bespoke designs at a creative, artisanal and technological level. Starting from an idea, Custom Design Hub is able to execute with the utmost care every step of the process: design, manufacturing and subsequent quality control.

Nuestro taller es el lugar donde se unen las necesidades proyectivas más exigentes y específicas, y nuestra experiencia y capacidad de fabricación en diseños bespoke a nivel creativo, artesanal y tecnológico. Partiendo de una idea, Custom Design Hub es capaz de ejecutar con sumo cuidado cada uno de los pasos del proceso: diseño, fabricación y control de calidad posterior.

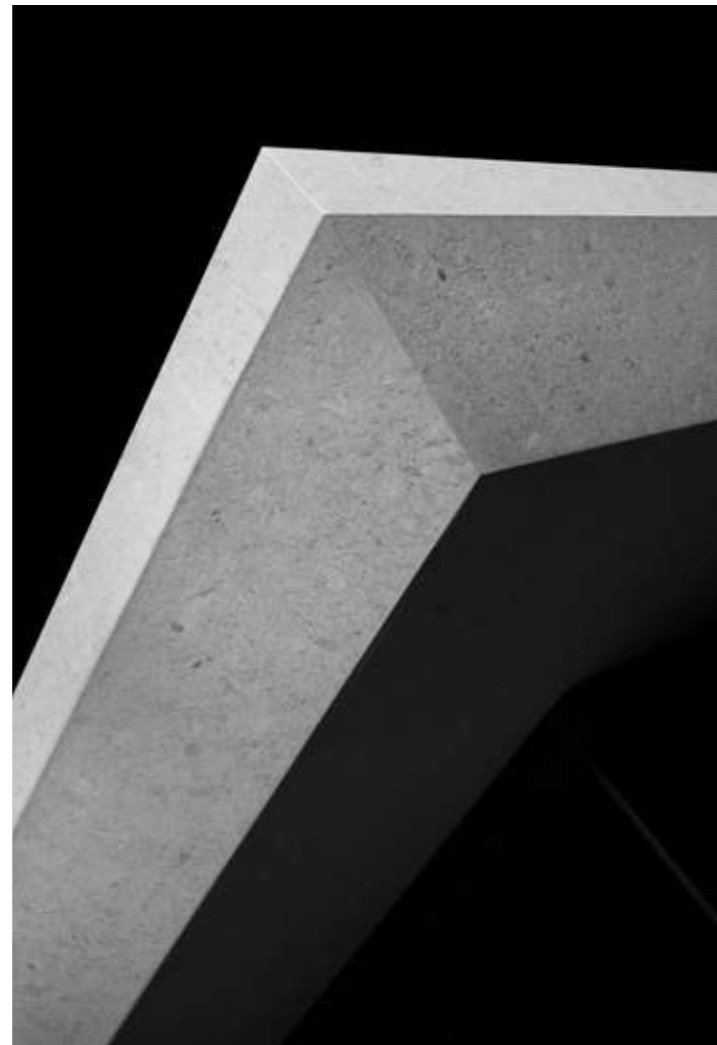

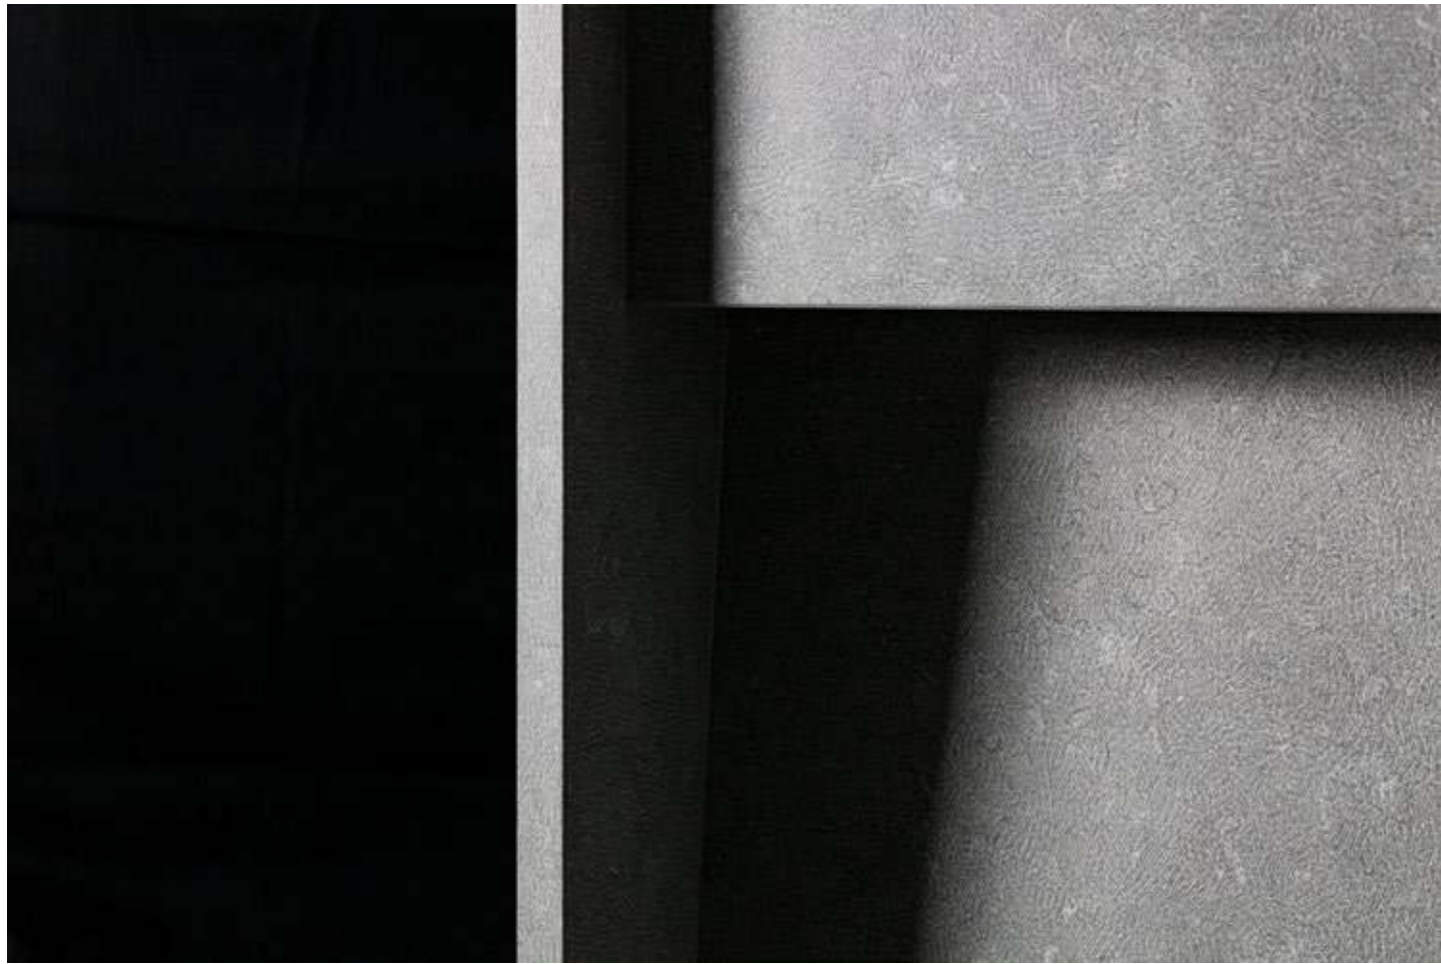

The Livingceramics and Lithotech collections are the basis of our workshop. From materials with thicknesses of 6mm, 9mm, 12mm and 20mm, Custom Design Hub will be able to make your designs a reality. These will have the genuineness of our ceramic surfaces in which texture plays a fundamental role. The designs can be completed with raw materials that stand out for their high quality and beauty and that are treated with the necessary delicacy and techniques to show their best version.

Every cut, joint and aesthetic detail will be manufactured and supervised by a team specialized in attention to detail capable of working at the highest level of complexity. A background that allows us to focus on each client's project and treat it as what it is, a unique opportunity to create unique pieces based on the excellence that only the combination of creativity, quality, experience and know-how can offer.

La base de nuestro taller son las colecciones de Livingceramics y Lithotech. A partir de los materiales con espesores de 6mm, 9mm, 12mm y 20mm, en Custom Design Hub podremos hacer realidad tus diseños. Estos contarán con la genuinidad de nuestras superficies cerámicas en las que la textura juega un papel fundamental. Los diseños podrán completarse con materias primas que destacan por su alta calidad y belleza y que son tratadas con la delicadeza y técnicas necesarias para que muestren su mejor versión.

Cada corte, junta y detalle estético estará fabricado y supervisado por un equipo especializado en la atención por el detalle capaz de trabajar al más alto nivel de complejidad. Un bagaje que permite centrarse en el proyecto de cada cliente y tratarlo como lo que es, una oportunidad única de crear piezas singulares basadas en la excelencia que solo ofrece la combinación de creatividad, calidad, experiencia y el saber hacer.

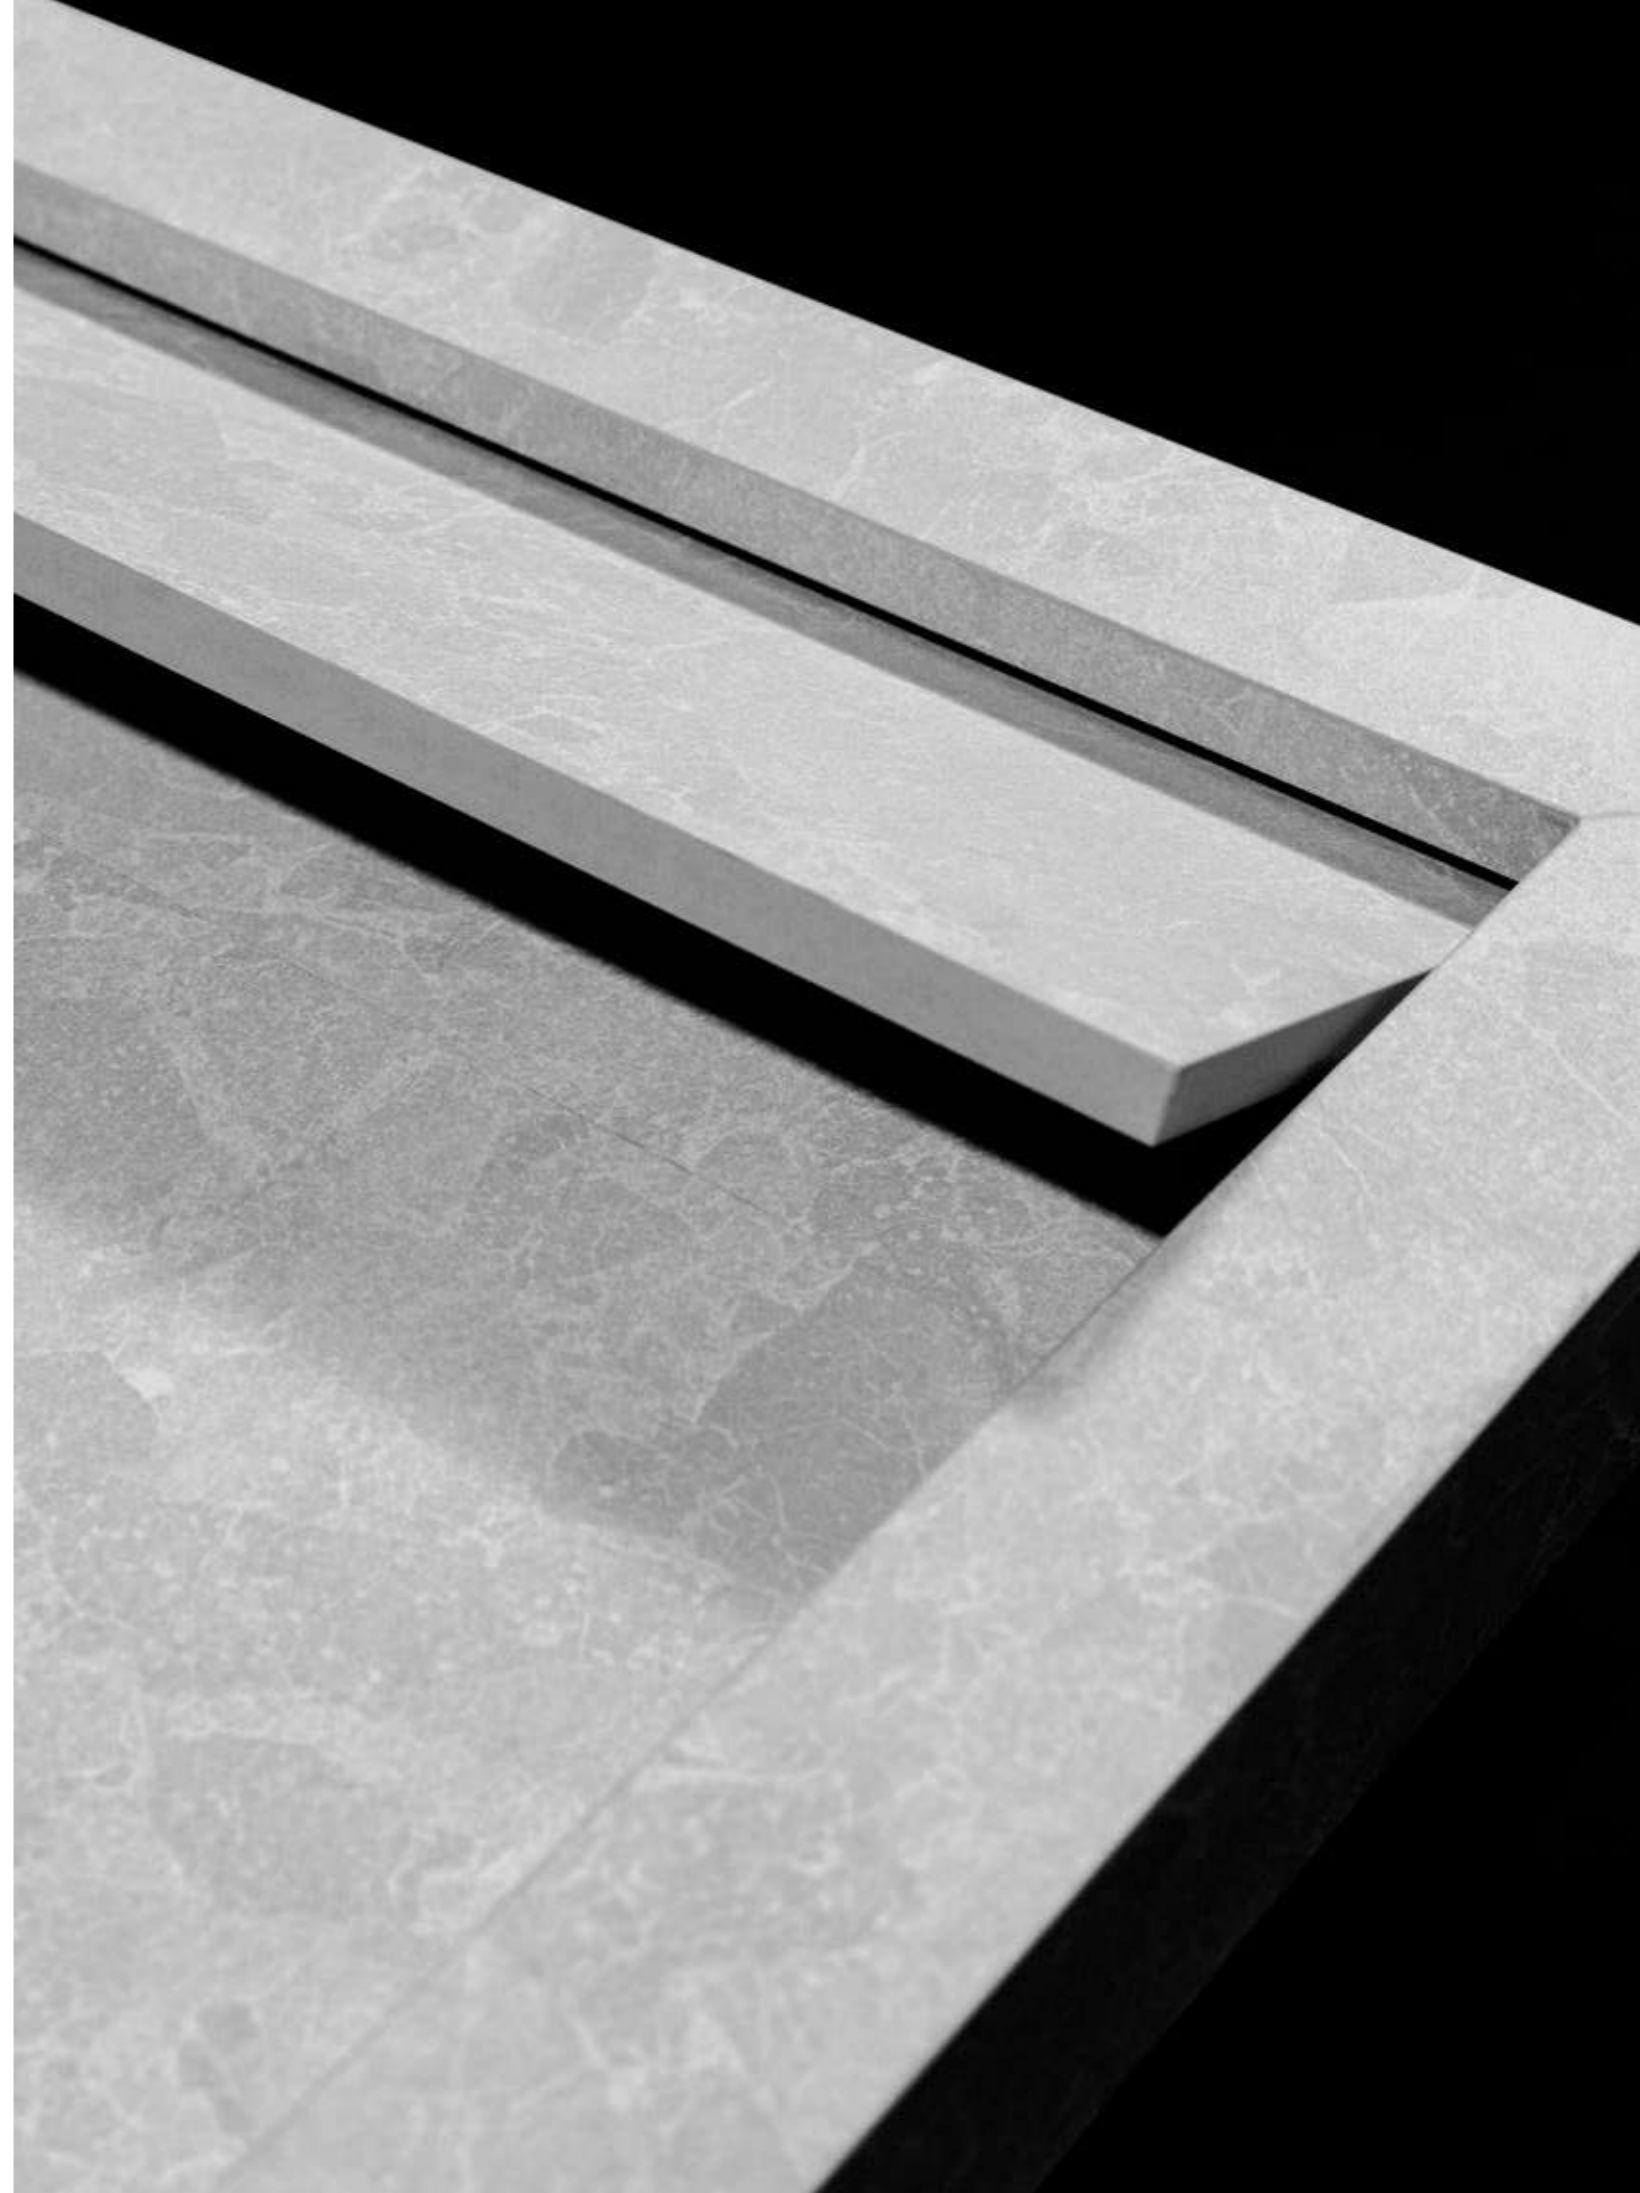

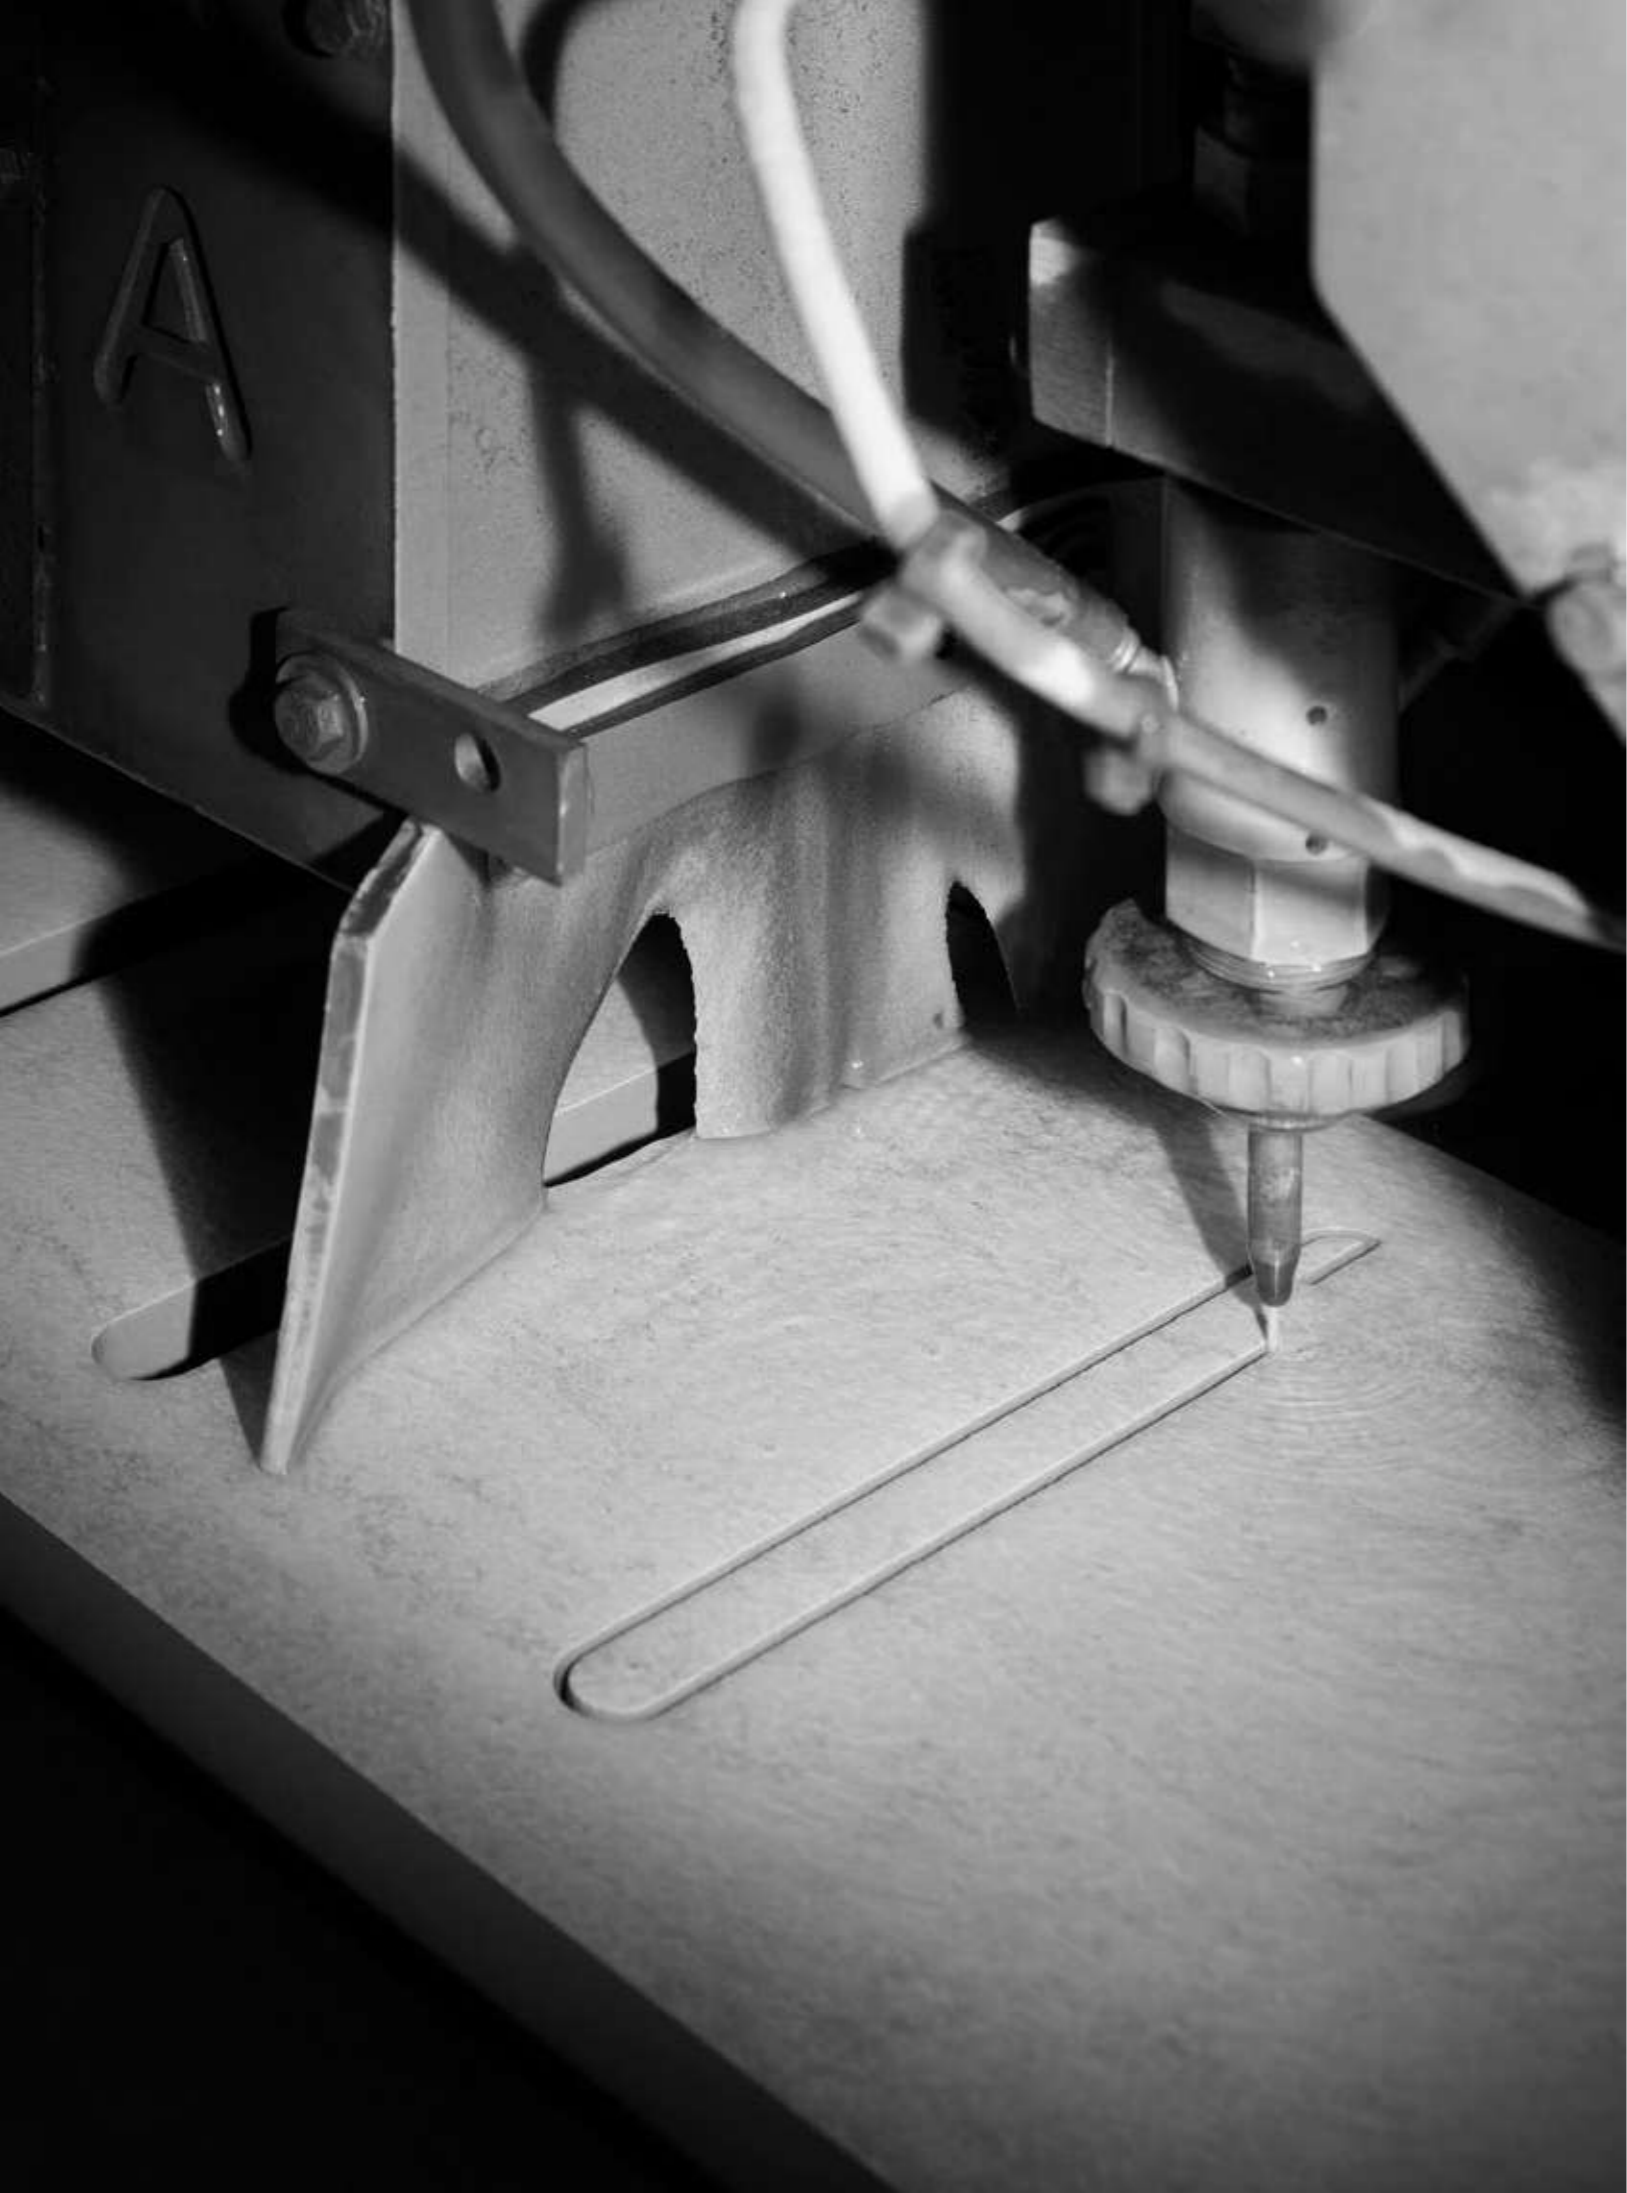

Another of the advantages of in-house manufacturing in our workshop with an experienced professional team is the possibility of controlling not only the manufacturing processes from the inside, but also the final quality control. Knowing from the inside that the finishes you are looking for are met and not settling for others, makes the difference so that the designs are just as you have imagined them. Continuous veins, clean angles and perfect joints are combined with an exhaustive quality control that makes each piece a special work of craftsmanship.

Otra de las ventajas de la fabricación interna en nuestro taller con un equipo profesional con experiencia, es la posibilidad de controlar desde dentro no solo los procesos de fabricación, sino el control de calidad final. Conocer desde dentro que los acabados que se buscan se cumplan y no conformarse con otros, marca la diferencia para que los diseños sean tal y como los has imaginado. Vetas continuas, ángulos limpios y uniones perfectas se unen a un exhaustivo control de calidad posterior que hace de cada pieza, un trabajo de artesanía especial.
